Experience

Software Engineer, **TUNE Consulting** – Tashkent Apr 2026 – Present

- Ship and maintain production web applications for finance, CRM, LMS and SaaS products in a 7-developer team, choosing Next.js SSR or CSR per product and managing state with Redux and Zustand.
- Design reusable component architecture and a shared UI library built on shadcn/ui, adopted across multiple projects to keep interfaces consistent.
- Implement data-heavy dashboards, tables and forms with role-based access and Zod validation, structuring codebases with Feature-Sliced Design and contributing to architecture decisions.
- Add Vitest unit tests and support GitLab CI deployment pipelines; review code and work with backend, design and product teams in an agile workflow.

Frontend Mentor, **"Algoritm" IT Learning Center** – Namangan Jun 2025 – Mar 2026

- Mentored 36 students through real-world React, Next.js and TypeScript projects, reviewing their code on GitHub and preparing them for technical interviews.
- Designed course materials, practical assignments and workshops on JavaScript internals, state management and performance optimization.

Full Stack Developer, **TECHNOVA** – Namangan Aug 2024 – Apr 2025

- Built a POS and accounting system for retail stores covering sales, inventory, products and cash flow, delivering features end-to-end from PostgreSQL schema design to React and TypeScript UI.
- Developed RESTful Node.js APIs with secure authentication, role-based access control, Zod validation, and reporting and analytics endpoints.

Full Stack Developer, **XCODE LLC** – Namangan Sep 2023 – Jun 2024

- Built AutoHub, an online car marketplace with listings, advertising placements and interactive 3D vehicle viewing in Three.js.
- Created a milk-supply management system for Lactalis (formerly Nestlé Namangan) tracking deliveries, volumes and quality inspection results for 10 drivers on Node.js and PostgreSQL.
- Integrated the Telegram API to upload and store images automatically, from database and APIs through to the React interface.

Middle Frontend Developer, **RealSoft** – Namangan Mar 2023 – Aug 2023

- Shipped the frontend of Navbatda, a queue management system automating customer queuing and booking, in a 14-person team using React, TypeScript, Redux Toolkit and Tailwind CSS.
- Implemented real-time queue tracking over WebSocket and admin dashboards, integrating REST APIs through RTK Query with the backend team.

Freelance Web Developer, **Self-employed** – Remote Mar 2022 – Feb 2023

- Delivered 2 e-commerce websites for small-business clients with React and TypeScript, owning requirements, responsive UI and deployment.

Frontend Web Developer, **NISD** – Namangan Mar 2021 – Feb 2022

- Developed the frontend of Oxygen House, an online apartment sales platform, in a 6-person team: catalog, floor plans, availability and a purchase flow for cash, installment and mortgage plans.
- Added role-based access control and monthly reporting dashboards with React, Redux, RTK Query and Tailwind CSS on Vite, working from Figma designs and Swagger-documented APIs.

Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL
Frontend: React.js, Next.js (SSR/CSR), Redux, Redux Toolkit, RTK Query, Zustand, Zod, Tailwind CSS, shadcn/ui, Three.js
Backend and Data: Node.js, REST APIs, WebSocket, PostgreSQL, Telegram API
Testing and Tools: Vitest, Git, GitHub, GitLab CI, Vite, Swagger, Figma
Practices: Feature-Sliced Design, component architecture, role-based access control, code review, performance optimization, mentoring

Certifications

Introduction to Software Engineering – IBM (Coursera), ID 69I1NQJM6E5T Mar 2026
Introduction to Front-End Development – Meta (Coursera), ID 5Q4F24VXKW1H Mar 2026
